GUEST LECTUERE Lr./KSRMCE/Department of ME/2021-22/

Date: 8-11-2021

To,
The Principal,
K.S.R.M. College of Engineering,
Kadapa.

Respected Sir,

//THROUGH PROPER CHANNEL//

Sub:KSRMCE-Department of ME-Permission and Financial Assistance for GUEST LECTUERE -
Requested-Reg.

It is Brought to Your Kind Notice that, Department of Mechanical Engineering of our organization
was planning to conduct a 1 HR GUEST LECTUERE for V sem Students of the department. Details of
Guest Lectuere "AN OVER VIEW OF CONDITON MONITRING TECHNIQUEES INT THE
DIAGNOSIS OF MACHINE ELEMENTS" schedule are over leafed for your kind reference. In this Regard
we Kindly request you to Provide Permission and Financial Assistance to procure the needs and for smooth
completion of the program, for which kind of act we would be grateful to you sir.

Thanking you

Yours Faithfully,

Sri C.NAGARAJA

(Course Coordinator Dept. of ME)

Forwarded to principal sir
W. Janani

DEPARTMENT OF MECHANICAL ENGINEERING

CIRCULAR

It is here by informed to all 3rd year mechanical engineering students that the department is going to organize GUEST LECTURE "AN OVER VIEW OF CONDITON MONITRING TECHNIQUEES INT THE DIAGNOSIS OF MACHINE ELEMENTS " on 18/11/2021 FROM 9.30:00 TO 11:30 NOON. Hence all the interested students are requested to join with the program.

ACTIVITY REPORT

GUEST LECTURE

18TH NOV 2021

Target Group : V sem Mechanical students

Details of Participants : 53

Coordinator(s) : Sri. C.NAGARAJA

Organizing Department : Mechanical Engineering

Plat Form : Online

Venue : SEMINAR HALL MED

Topic : AN OVERVIEW OF CONDITION MONITORING TECHNIQUES
IN THE DIAGNOSIS OF MACHINE ELEMENTS

Speaker : Sri B: Vishnu vardhan Naidu, M.Tech (NIIT, Calicut)

Description :

Condition monitoring (colloquially, **CM**) is the process of monitoring a parameter of condition in machinery (vibration, temperature etc.), in order to identify a significant change which is indicative of a developing fault. It is a major component of predictive maintenance. The use of condition monitoring allows maintenance to be scheduled, or other actions to be taken to prevent consequential damages and avoid its consequences. Condition monitoring has a unique benefit in that conditions that would shorten normal lifespan can be addressed before they develop into a major failure. Condition monitoring techniques are normally used on rotating equipment, auxiliary systems and other machinery (compressors, pumps, electric motors, internal combustion engines, presses), while periodic inspection using non-destructive testing (NDT) techniques and fit for service (FFS)^{III} evaluation are used for static plant equipment such as steam boilers, piping and heat exchangers.
