7.1.7 – Assistive technology and facilities for Divyangjan accessible website, screen-reading software, mechanized equipment –

Using Free or Open-Source Software (NVDA)

KSRMCE believes that it is important for every individual to access or use the facilities on campus, in this regard providing a free, open source and globally accessible screen reader like NVDA (Nonvisual Desktop Access) to visually impaired students. This software was created in 2006 by Michael Curran (developed by the blind for the blind). The software supports Microsoft Office applications and improved accessibility of mathematical formulas with support for MathML through MathPlayer and improved support for Mint.

Display of NVDA Icon (Screen Reader) on the Desktop in the Central Library	Student Listening the Screen Reader
