Mission P116 - Plan to realize High Impact Placements in 2021-22

       Placements have gradually become an integral part of an institute's offerings. Students pay special attention to placement records while selecting a college for the admission. Placement track record helps the students to comprehend their future accomplishments and encourages fresh applicants for admissions. A good placement record is also helpful in making an institute secure a higher spot in the college rankings. National Institutional Ranking Framework (NIRF) gives great importance to the placement records.
       The objective of this, is to harmonize the efforts of students, parents and faculty towards targeted training and placements for 2022 passed out batch.

Mission P116 is a comprehensive plan to achieve high impact placements in 2021-22.
1. 116+ high impact placements in software and core MNC companies
2. Train 300 students for software jobs
3. Train 90 students for core jobs in ECE, EEE, CE and ME disciplines

       The mission of P116 is to prepare the students for future placements. This entails high quality instruction delivery supported by allied activities like aptitude, reasoning, group discussion and software training etc. It is the responsibility of the College to provide systematic support to the students' members so that, they are properly equipped to meet the demands of the instruction.

       In this context, developing a framework for instruction delivery and benchmarks for measuring the attainment of the outcomes quantitatively and qualitatively are essential. This practice is designed to address this issue. Appropriate remedial steps are taken for continuous improvement.

The Practice:
       To train the students under Mission P116, the coordinators from each department call the applications and scrutinize the students according to the guidelines given in the format, i.e., they should satisfy minimum CGPA of 6.00 (60%), if required a screening test is to be conducted. After shortlisting, the option or choice is given to the student according to his/her wish or interest to join. As per the invitations the program coordinator is divided the students into two groups, i.e., (i) Software team and (ii) core team. The programs offered according to the interest for software stream aptitude and coding and for core stream lab VIEW, Catia and Revit. The professional trainers were appointed to conduct the classes for both software and core streams.

Training schedule:
       The coordinator / mentors will prepare the training schedule as per the required enrollment and the schedules is
1. For the software stream –
   a. 300 students to be divided into 5 groups of 60 each
   b. Training categories and duration
       i. Aptitude - 10 days (60 hours)
       ii. Programing: c/python - 6 days (40 hours) - any one language
       iii. Company specific: TCS, Infosys, Wipro - 8 days (50 hours) each

c. Total training duration - 40 days (250 hours)
d. Practice tests - 3 per week
e. Grand/company specific tests - 1 per week
f. Training + practice period - Jan 18, 2021 to May 31, 2021 - 19 weeks
2. For the core stream
a. Domains: LabVIEW, Catia, Revit
b. Enrollment: 30 students per domain
c. Training + practice period: Jan 18, 2021 to May 31, 2021 - 19 weeks
d. Total training hours: 200
e. Mini projects - 4
f. Capstone project - One (three students per project batch)

Challenges:
Student motivation: There is an urgent need to prop up students in their efforts to undertake systematic, arduous training culminating in placements. The faculty members' support is crucial to motivate students and keep them engaged throughout the process.

Skill gap: Considering the past experience, there is an urgent need to bridge the gap between industry requirements and the existent skill set of the students.

Evidence of Success: The following table depicts the overall improvement in the placements.
